

Professional Profile

I am a driven professional with a broad technical skillset and I thrive in environments that constantly embrace new technologies. I'm known for my ability to multitask and juggle multiple, pressing projects simultaneously. I have excellent written and verbal skills, which can be seen from my interaction with clients. I work well under pressure and I'm able to respond to problems and correct them efficiently.

Career Development

Full Stack Web Developer

Apr 2016 - Sept 2016

myGSPN

I was contracted for six months to help a team build a web application from the ground up. The front-end was built entirely on Angular while the back-end utilized a CodeIgniter API with a custom built token system. We utilized git extensively to maintain our codebase.

- Coded, maintained, and debugged our web app (Angular)
- Created admin panel for our area managers to use
- Rewrote the routing for our app utilizing best practices
- Utilized git extensively
- Developed a step-by-step tutorial for new users
- Debugged our mobile app (Ionic)
- Wrote modular code based on the MVC structure both on the front-end and back-end
- Maintained our Linux server
- Used CodeIgniter 3 to create our API with a custom built token system

Web Developer

2008 – Present

Various Clients

Freelance web designer/developer with accountability for marketing and selling services, managing all client relationships, controlling budgets, and designing/developing websites and web based applications.

- Completely redesigned website to work as web application using the Meteor.js development environment
- Designed, developed and implemented proof of concept, platform independent social application layer (User Interface, application/business and data access tiers) based on 3rd party web services
- Selected to design and develop web presence for start-up company. Currently creating user-friendly website and back-end system that will allow the company's employees to make updates to the site and manage customer accounts.
- Developed numerous Javascript and jQuery applications
- Painstakingly tweaked webpages to decrease download times and increase user experience
- Developed complex algorithms for querying multiple databases such as MySQL and MongoDB
- Designed and developed a customer portal on the company website that allowed direct communication with clients and our customer service department as well as providing clients and account administrators with client data visualizations.
- WAMP/LAMP Stack Administration/Configuration

IT Manager

Aug 2015-Apr 2016

Fides Solutions

Work hand-in-hand with our clients to cover their IT needs, while maintaining an outstanding relation through committed service

- Negotiated with ISP to slash monthly cost of internet by 10% for our largest client
- Ensure the optimal performance of business-critical networks, workstation equipment, websites, user applications, and databases.
- Assess the capabilities of existing systems and processes with the goals of identifying improvement opportunities
- Evaluate emerging technologies for suitability with long-term business goals
- Elevated productivity two-fold by unionizing two separate workgroups and synergizing multiple departments, saving our client time and money
- Installed various server environments such as Hyper-V for RDP
- Maintained Windows Active Directory for all clients and their employees
- Maintain client websites by updating text and images and adding functionality such as login capability
- Procure hardware, software, and equipment

Show Control

Sept 2014 – Present

Universal Studios Florida

The person who works Show Control must wear different hats. It is our responsibility to run the shows and parades that play in our park while also making sure the audio is in sync as well as maintaining correct GPS locations on all of our floats. If anything goes awry, we must fix it without hesitation for the show to continue.

- Monitor multiple programs across many computers simultaneously
- Saved numerous shows and performances from being downed by efficiently correcting issues
- Repair and replace server/audio equipment
- Quality control of audio throughout the park
- Record all deviations from the norm onto a spreadsheet
- Utilize phone, email, and radio to alert the correct persons of issues
- Use exceptional customer service to help our guests with their needs

Lead Show Technician

Sept 2010 – Sept 2014

Wizard Connection

Wizard Connection is the largest event production company in the southeast United States. Much of what I had to do was interacting with our clients to make sure their shows exceeded their expectations.

- Maintained client relations by consistently exceeding expectations
- Perform AC/DC electrical maintenance on all props
- Utilized time management skills to ensure shows are prepared in time
- Programmed lighting for shows/concerts
- Manage teams of up to 50 people to ensure show success
- Interact efficiently with clients
- Build/Design LED lights
